28 MAY 1980

MEMORANDUM FOR: Chief, Management Staff, ODP

FROM: [redacted] Chief [redacted]
Information Systems Security Group, OS

25X1

SUBJECT: Interim SAFE terminal to have access to VM

REFERENCE: Memorandum from [redacted] NCPO/W, 25X1
dtd 25 April 1980, subject: Request for ADP
Support 25X1

[redacted]
the reference request to access the Agency VM system via a
remote terminal currently in use by NCPO/W for accessing
the Interim SAFE System. [redacted]

25X1

2. This remote terminal is a Delta Data 5000
located in suite 1D-867, the Pentagon. In addition, the
suite is located [redacted]

25X1

[redacted] to which access is controlled by an
around-the-clock guard force, seven days per week. A
volumetric (motion detection) alarm system in the five
room suite provides complete area coverage. The alarm
control (access/secure) box is located on the internal
wall of the suite in proximity to the main entrance door,
1D-867. The alarm is monitored by the Federal Protective
Officers (FPO's) at the [redacted]. Physical
Security Division personnel surveyed the site in April
1979 and advised that the physical security measures
are adequate. [redacted]

25X1

3. [redacted] advised Information Systems Security
Group (ISSG) that the terminal will be only used during
normal working hours. Access to VM and SAFE will be
limited to [redacted] and his company of two professionals
and one clerical within the office. All are DCI personnel

who possess CIA Staff clearances which include a polygraph examination. During all hours of occupancy the office suite is under the control of a NCPO/W staff person. Access to the suite is restricted to persons who have been identified by NCPO/W personnel. The offices are not left unattended unless the combination lock on the main entrance door has been set and the alarm system activated. ☐

25X1

4. Information Systems Security Group has no objection to use of the Interim SAFE terminal for VM access as long as the following procedures are met:

a. The terminal will have personnel designated as monitors to exercise proper control over terminal access. The monitors will be responsible for assuring that the terminal is properly logged off the system and secured at the close of business each day. ☐

25X1

b. In the event of spillage (receipt of unrequested data), the user must immediately notify the ODP Security Officer. ☐

c. ☐ informed ISSG that the data which NCPO/W will enter into the VM system will be releasable to anyone with proper clearances within the Intelligence Community. Therefore, all output must be screened for spillage prior to distribution to other members of the Intelligence Community. ☐

25X1

d. Any data that is printed in hardcopy form will be done remotely at CIA Headquarters and forwarded to NCPO/W by using the Agency courier system. ☐

25X1

e. Each individual requiring access to the VM system must be assigned a valid VM Userid and password. ☐

5. Please advise ISSG when VM Userids and passwords are assigned so that we may brief NCPO/W personnel on security requirements. ☐
